- Open discussion

My City Project- An Overview

The project envisages improvement in urban service delivery in the city of jaipur through enhanced civic engagement and coordination among citizens, elected representatives and JMC officials.

During August 2012- July 2013, the Governance Team at CUTS in partnership with The Asia Foundation intervened in eight selected wards of Jaipur city and made an attempt to improve services and amenities which comes under the purview of Jaipur Municipal Corporation, by enhancing accountability of administrative and electoral bodies.

The services and amenities targeted under the intervention were water supply, sewerage, solid waste collection, street roads, street lights, parks and community halls. The interventions were social accountability tools and specific advocacy strategies.
